TRANSMISSION MECHANISM, MONETARY POLICY, INTELLIGENT MODEL, FINANCIAL INDICATORS, FINANCIAL SYSTEM, SYSTEM DYNAMICS.

Object of research - forecasting of indicators of the financial system of Ukraine.

The purpose of the thesis - review of the channels of monetary transmission; analysis of existing approaches to the construction of intellectual models of the transmission mechanism of monetary policy, identification of their advantages and disadvantages; development of an intellectual model for forecasting of some indicators of the Ukrainian financial system.

The paper reviews and analyzes the channels of monetary transmission; the scheme of the transmission mechanism of Ukrainian monetary policy is developed. In the course of the study, it was discovered that the analysis of the monetary transfer allows to obtain fairly accurate results.

In carrying out further research, it is expedient to create models with more input parameters, and which in more detail consider each of the elements of the transmission mechanism of monetary policy of Ukraine to create a more precise forecast.
