Kaunas University of Technology

is one of the largest technological universities in the Baltics, fast forwarding to becoming an internationally acknowledged institution of higher education, known for its linkages with business, leadership in scientific research, flexible interdisciplinary study programmes, learning and development opportunities.

Our mission & vision

is to provide research-based studies at international level, creating inspiring environment for fostering talents and leaders. Innovative research by globally renowned research groups, technology transfer and joint endeavors towards society progress are the keywords defining KTU.

APPLY

If you are interested, please apply by sending your CV and additional documents proving scientific and teaching experience or qualification, by email: cv@ktu.lt.

The Faculty of Informatics

is the first and one of the largest research and education centres in Lithuania offering studies in information technology field, where more than 2,000 students are taught by about 200 teachers. Every year, the number of professionals joining our teaching staff increases – the representatives of leading Lithuanian and international organisations and institutions contribute to the training of the sought-after young IT specialists. We are proud not only of our students, whose number is growing fastest in Lithuania and whose achievements and skills are praised by employers across the globe, but also of our scientists and researchers who are actively involved in conducting interdisciplinary research projects together with business, industry and state institutions. First in Lithuania cybersecurity training, smart homes and environments, e-health products and services and other inventions are among the award winning innovations that have already found their way to the global market.

The Faculty offers

bachelor's (6 study programmes), master's (5 study programmes) and PhD (2 study areas) studies. Scientific research in the Faculty focuses on the field of information systems' development and their adaptation in various areas
